Introduction

Background and Purpose

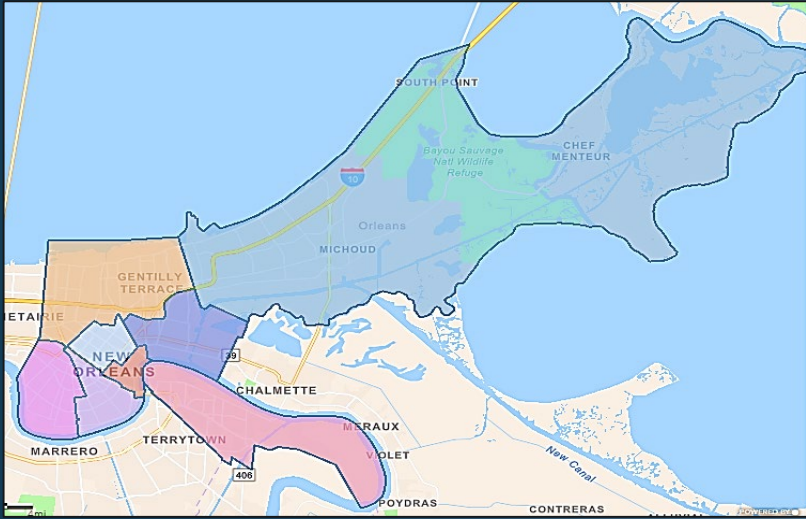

- ◎ The MCC has released several reports documenting increases in 2020 violent and property crime in comparison with 2019. **We now seek to provide a breakdown of five-year trends for each of the eight NOPD police districts**
- ◎ Law enforcement agencies often use district-level crime trends to inform policies and allocation of resources, but crime in our community affects the quality of life of every resident of every neighborhood in the city
- ◎ It is our hope that sharing this information with the residents of our community will facilitate a higher level of citizen awareness, engagement, and support of law enforcement efforts to mitigate crime

Selection of Specific Criminal Offenses

- ◎ Data was compiled and analyzed using the NOPD's Calls for Service data from 2016 through 2020
 - Only calls marked "REPORT TO FOLLOW" by police were included for analysis, as these represent official incidents that were/will be recorded in the FBI's annual Uniform Crime Reports (UCR)
- ◎ For the purposes of this report, we chose to include **felony crimes that represent the greatest threat to public safety:**
 - **Homicides, Shootings, Armed Robberies, Carjackings, Vehicle Burglaries, and residence Burglaries**
